

ATTENTION! All RM Finance users

Don't miss out on our new report writing service...

Do you spend too much time trying to combine financial information from a dozen different reports?

Are you frustrated that you can't quite find the layout you are looking for?

Do your governors and senior management team insist on a specific reporting format?

If the answer to any of the above questions is YES then please read on...

No matter how many customer-focused reports we include in our RM Finance package, it is only natural that your specific requirements may not always be catered for. So we have taken the step of integrating RM Finance with Crystal – one of the foremost report design engines available on the market today.

Within RM Finance you can now embed bespoke Crystal reports into the 'Ad-hoc' tab of our reporting tool, making them instantly available, all at the click of a mouse. These Crystal reports can bring together any number of fields within the RM Finance data structure, offering complete flexibility over the information you can present on a single report.

Let our experts create that special report...

In tandem with this innovative RM Finance functionality, we are launching our new report writing service; whether it is an Asset report, a Budget report or a Governor's report, our Crystal experts can develop that specific financial report that's just right for you.
